For the grown-up

- Give it five to ten minutes. Read the instruction aloud, let your child work on their own, then mark it together.
- If they are stuck, hold up ten fingers and fold down the number they can see. The fingers still up are the answer.
- A common slip is copying the number they can see: 7 + 7 = 10. Ask them to count on from 7 to 10 to check.
- When this feels easy, try the mixed bonds of 10 sheet, then try this one again against a two-minute timer.
